Vincent Keith 9 (@VagabondPhoto) reported 35 minutes ago @MelonieMac I suppose if one views "violence" in games as real, it might be a problem. There are games I won't play because they display anti-Christian values throughout, like GTA. I would never condemn someone playing it. It's a choice, maybe not the best choice, but it's just a game. Paulo Truta (@paulotruta) reported 47 minutes ago @Soundtrackfoda @ScanningMobile @PPSSPP_emu Yep... Chinatown wars has that super low rendering problem... But what about GTA LCS or VCS? :D Justin Zombie Angelo (@JustinAngelo111) reported 58 minutes ago @SWEGTA Naw that's a stretch with this one. GTA 5 probably was the best & worst with additions in the game. The oppressor mk 2 is a major problem that nerfing the vehicle will not really do much. His airness13 (@Rauldeleon13) reported an hour ago @videotech @SWEGTA I don't mind the female protagonist at all but the "culturally sensitive could be a problem as it could be watered down gta in a way. GTA is a game they never gave a **** but when remastered were made some "offensive" stuff was removed. Ben (@videotech) reported an hour ago @SWEGTA I don't see how it's an issue if the next GTA features a female protagonist? People are losing their minds over this for whatever weird reason. I, for one, have always hoped Rockstar would explore the idea of adding a female protagonist. Jazz Cruiser (@Jazz_Cruiser) reported an hour ago @LarryTheShagger @gamingbible @RockstarGames If R.A.G.E. is that good, then it will no problem for the devs to own #UE5, in terms of graphics,right? As a result, Rockstar Games may have to shut down the servers from time to time. Players may experience server issues when attempting to join a session if this occurs. It's difficult for players to figure out where the problem comes from at this point. This shouldn't be a cause for concern as GTA Online rarely undergoes server issues. It is, for the most part, quite a smooth experience for most players. This article explains how players can check if the server is down for the game. GTA Online: How to check server status for the game The first step for GTA Online players to check the game's server status is to go to the appropriate website. Navigate to the Rockstar Games Support Service Status website. Direct link. The following picture is an example of how the website shows the server status of the games and online services. The games and services shown are Red Dead Online, GTA Online, Rockstar Games Social Club, and Rockstar Games Launcher. The website shows the server status of all the online services (Image via Rockstar Games Support) For Red Dead Online and GTA Online, the relevant platforms and cloud gaming services are listed. The key to understanding the server status is from the color of the icon beside the platform names. This has been explained as follows: Green - Server is up and running smoothly.Red - The server is down, and hence, players will be unable to start a session.Yellow - Limited, this indicates that although the servers are running, players may face difficulty finding sessions. By checking this website, players can easily determine if their issues are widespread or limited to their setup. GTA Online is one of the most popular multiplayer games of the modern era, with a sizeable player base. A project like this is a massive commitment for any studio. It needs ongoing support and maintenance to provide a seamless gameplay experience for everyone. Rockstar is constantly updating the game and bringing new content and rewards with routine updates.Even after almost a decade, GTA Online has been growing in popularity. The game has more players today than before. Los Santos Tuners has broken the record for the maximum number of active players on the day of an update's release. Edited by Srijan Sen Coming soon!
